Curriculum Vitae – October 13, 2026

Research Positions & Funding Awards

10/26– **Max-Planck-Gesellschaft (MPG) Partner Group Leader** – MPIA partnership, Heidelberg, €100k

05/25– **Royal Society University Research Fellowship**: *'Environmental origins of exoplanet diversity'* – Queen Mary University of London, £1.83M

09/24–04/25 Visiting researcher – Max Planck Institute for Astronomy, Heidelberg

10/23–04/25 **Marie Skłodowska Curie Fellowship**: *'Observational signatures of planet formation in irradiated discs'* – Observatoire de la Côte d'Azur, €195k

10/22–10/23 PDRA – Kinematic signatures of planet formation in protoplanetary discs, Observatoire de la Côte d'Azur

6/22–7/22 Visiting researcher – Chemical inhomogeneities in globular clusters, Institute of Astronomy, University of Cambridge

4/22 **Paris Regional Fellowship** (declined), €130k

3/20–3/22 **Humboldt Fellowship** – *'Planet evolution in dense stellar clusters'*, Heidelberg University, €80k

5/19–3/20 PDRA – *'Photoevaporative disc winds around binary stars'*, University of Leicester

9/18–11/18 DFG funded visiting Ph.D. student – *'Linking galactic-scale star formation physics to protoplanetary disc survival'*, Heidelberg University

Education

2026– PGCAP/Certificate in Learning and Teaching (CILT), Queen Mary University of London

2015–2019 Ph.D., Institute of Astronomy, University of Cambridge
Graduation date: Oct 2019, Supervisor: Cathie Clarke
Thesis: The influence of stellar birth environment on protoplanetary disc evolution

2011–2015 MMathPhys (Master of Mathematics and Physics), University of Warwick
1st Class Honours, Supervisor: Andrew Levan
Dissertation: Host galaxies of core collapse supernovae

Publication and Research Summary

My broad research focus is on the connection between large-scale environment and planet formation. This involves unpicking connections between numerous topics including star forming regions, protoplanetary disc evolution, massive stars, stellar evolution, exoplanets, stellar clusters and galactic-scale star formation. By making connections between these areas, I have shown how the star formation environment influences the protoplanetary disc of dust and gas from which planets form. I have done this mainly from a theoretical

perspective, developed in close collaboration with observers and grounded in observational statistics. My research has been covered in popular science articles for journals such as New Scientist and Forbes. I have published 80 peer-reviewed articles (18 as first author), with an h-index of 26 and 1920 total citations. A full publication list is available on NASA/ADS.

Conference and Departmental Talks Summary

I have given 20 talks in departments across Europe, the US and China and at 42 international conferences since 2019. This includes 9 invited review talks at large international conferences. For a full list of my conference participation, see below.

Supervision

PhD Students

Oct 26– Scarlett Hutton, PhD Student (QMUL), Supervisor. Topic: Modelling multiple systems in the ISM

Oct 25– Oliver Brown, PhD student (QMUL), Supervisor. Topic: Dynamics of warped discs

Oct 24– Mika Kontiainen, PhD student (Cambridge), Project supervision (informal). Topic: The dynamical environment of exoplanetary systems

Nov 22–Dec 25 Rossella Anania, PhD Student (Milan), Co-supervisor. Topic: Simulating dynamical star-disc encounters in the Taurus star forming region

Aug 22–Dec 25 Daniele Fasano, PhD Student (Nice), Co-supervisor. Topic: Observational signatures of planetary induced spirals

Undergraduate & Masters Students

Oct 26– Shreya Harish Kerai, MSci student (QMUL), Supervisor.

Oct 26– Abubakar Rahimi, MSci student (QMUL), Supervisor.

Aug 26–Oct 26 Audrey Liu, Summer student (QMUL), Supervisor. Topic: Modelling the gas structure and possible planetary ejection around RW Aurigae

Feb 26–Aug 26 Fahham Kurji, Masters student (QMUL), Supervisor. Topic: Disc inclinations in local SFRs

Nov 23–May 24 James Wirth, Masters student (Cambridge), Supervisor. Topic: Testing analytic theory for planets in dense stellar clusters (paper submitted)

Nov 22–Mar 23 Linling Shuai, Bachelors Student (Nice), Supervisor. Topic: Simulating dynamical star-disc encounters in the Taurus star forming region

Teaching

2025-present Phyical Cosmology Lecturer/Module Co-organiser, Third year undergraduate course

2015-19 Part II Supervisor (3rd year undergraduate, University of Cambridge): General Relativity, Four hour long supervisions of approximately 3-4 groups of 2 or 3 students each year

2017-18 Part II Supervisor: Astrophysical Fluid Dynamics

Current Large Collaborations

Since 10/22 exoALMA, *ALMA large programme,*

Since 11/20 Transition Discs, *DFG funded research unit: FOR 2634/1, 2634/2*

Since 03/20 EWOCS, *Extended Westerlund 1 and 2 Open Clusters Survey*

Since 03/20 XUE, *eXtreme UV Environments*

Community

JWST Selected as **Cycle 4 JWST discussion panelist** and for Cycle 2 and 3 JWST external panel

ALMA Cycle 12 External reviewer, Cycle 9, 12 distributed peer review

Conference organisation LOC for PLATO Theory group meeting QMUL (approx. 80 participants, 2025), exoALMA Nice workshop 2024 (approx. 20 participants), SOC for EAS conference 2024 Special Session (Planets in multiple systems), Session chair at PLATO conference 2021 (MIAPP, online)

Reviewing Junior fellowship grant reviewer for Fondazione Cariplo (2025/2026) and Humboldt Foundation (2026), STFC small grant reviewer. Review approximately 4 papers a year for MNRAS, A&A, AJ, ApJ and Nature Astronomy

Meetings QMUL AU weekly seminar organiser and host 2025/26, 'Discs meeting' organiser, Observatoire de la Côte d'Azur – monthly cross group meetings, 2023/24

Observing Time

IRAM:

S26BC, Co-I *Massive disks or environmental feeding? A NOEMA census of Gaia-discovered high-accretion young stars* – 42.0h, Grade B

S26AQ, Co-I *Investigating a possible precursor to long-lived "Peter Pan" protoplanetary disks* – 16.0h, Grade B

PI 3mm – The interplay of late-stage infall and stellar dynamics in a six-star protoplanetary system, 50.6h, Grade B (observations in progress)

ALMA:

2026.1.00846.S *So close yet so far away: detecting the common reservoir of material between SU Aur and AB Aur* – PI: C. Toci, Grade C

2026.1.00679.S *The invisible majority: Testing CI as a tracer for CO-dark streamers* – PI: A. Gupta, Grade C

2026.1.00325.S *Investigating the unexpectedly high prevalence of late infall in the 3 Myr old Corona Australis Main disk population* – PI: J. Huang, Grade B

2026.1.00111.S *A chemical census of irradiated planet-forming disks in the Orion Nebula Cluster* – PI: L. Keyte, Grade C

2025.1.01316.S *So close yet so far away: detecting the common reservoir of material between SU Aur and AB Aur* – PI: C. Toci, Grade C

2025.1.00173.S *Tracing Astrochemistry through the Shadows* – PI: J. Stadler, Grade C

2025.1.00078.S *Spiralling into the midplane* – PI: D. Fasano, Grade B

2025.1.00282.S *Linking stellar accretion to late stage infall: an ACA survey of Lupus 3 disks* – **PI: A. J. Winter**, Grade C

2024.1.01479.S *First simultaneous measurement of the grain size and dust composition in a protoplanetary disc* – PI: F. Zagaria, Grade B

2023.1.00766.S *Spiralling into the midplane* – PI: D. Fasano, Grade C

JWST:

Since 03/25 A pocket of last resistance: characterizing the evaporating globule near a massive O-star binary, *JWST Cycle 4, ID. #8185, PI. Bik*

Since 02/24 The Crucible of Planet Formation - Protoplanetary Disks in the Extreme Environment of Trumpler 14, *JWST Cycle 3, ID. #5791, PI. Kuhn*

Since 05/23 Evolution of protoplanetary disks and early stellar evolution in starburst: A NIRCam and MIRI observation of the young starburst cluster Westerlund 2, *JWST Cycle 2, ID. #3523, PI. Guarcello*

Since 05/23 Direct detection of kinematically-detected protoplanet candidates , *JWST Cycle 2, ID. #3254, PI. Benisty*

Since 03/20 Physics and Chemistry of Planet-Forming Disks in Extreme Radiation Environments, *JWST Cycle 1, ID. #1759, PI. Ramirez-Tannus*

Since 03/20 Testing protoplanetary disk evolution and brown dwarf formation in starburst: NIRCAM and MIRI observations of the young cluster Westerlund 1, *JWST Cycle 1, ID. #1905, PI. Guarcello*

ESO:

P117, 117.29KM *The role of the environment on mass accretion in the Orion Nebula* – PI: G. Beccari, 16.3h

P116, 116.292Y *Capturing dusty winds in the Orion proplyds* – PI: S. Facchini, 8.0h

P116, 116.2936 *Completing JWST: VISIR observations of evolved stars in Westerlund 1* – PI: M. Andersen, 10.7h

P114, 114.272R *Disk survival in typical star/planet forming conditions* – PI: M. Reiter, 28.0h

P114, 114.2757 *Spectrally resolving the [CI]8727, 9824, and 9850 Å lines with UVES to decipher external photoevaporation* – PI: C. F. Manara, 16.0h

P113, 113.26CR *Characterizing the host stars of proto-planetary disks in extreme radiation environments* – PI: A. Bik, 7.5h

P113, 113.269Z *Determining the cooling timescale in a shadowed protoplanetary disk* – PI: M. Benisty, 8.0h

P113, 113.26GU *Direct imaging of protoplanet candidates driving kinematic signatures in disks* – PI: S. Facchini, 16.7h

P113, 113.26FK *Quantifying how much external photoevaporation reduces disk lifetimes* – PI: M. Reiter, 26.0h

Skills & Experience

Coding	Python, C/C++, Fortran, SQL, HTML
RT	RADMC3D
Hydro.	GANDALF (smoothed particle hydrodynamics), PLUTO/Athena++ (grid)
N-body	NBODY6, Mercury, Rebound

Obs./Data	Gaia, Kepler data products, ALMA spectral line fitting of protoplanetary disc models

Outreach

Mar 2026	'Think Space Lecture – 'Unveiling our origins'
Mar 2017/18	Cambridge Science Festival - Institute of Astronomy Discussed recent results in planet formation with the public
Mar 2016	Cambridge Science Festival - Designed computer game for children learning concept of gravity – Gravity Hero

Departmental Talks

Oct 2026	University of Bristol – Colloquium
Nov 2025	MPIA, Heidelberg – Königstuhl Colloquium
Apr 2025	SHAO, Shanghai – ET Seminar Series
Jan 2025	UCL, London – Star planet formation seminar
Oct 2024	MPIA, Heidelberg – Star and planet formation seminar
Dec 2023	ESO, Munich – Star and planet formation seminar
Mar 2023	University of Vienna – Clusters Group Seminar
Mar 2023	Bern University – Astronomy WP/CSH Colloquium
Feb 2023	Lund University – SDE Seminar
Dec 2022	Centre for Astronomy, Harvard – Planet Formation Seminar
Nov 2022	Observatoire de la Côte d'Azur, Nice – TOP Seminar
Jul 2022	Hertford University – Astronomy Colloquium
Nov 2021	Tübingen University – Astronomy Seminar
May 2021	University of Maryland – UMD Astronomy Colloquium
May 2021	University of Exeter – Astrophysics Seminar
Jan 2021	ARI, Heidelberg University – ARI Colloquium
Nov 2020	University of Arizona – Origins Seminar
Apr 2020	MPIA, Heidelberg – Könnigstuhl Colloquium
Mar 2020	ESO, Garching – Star and planet formation seminar
Dec 2019	University of Vienna – Monday colloquium

Conferences

May 2026	**Invited review: 'Planet formation across various environments and epochs' – MIAPbP, Garching**
Nov 2025	**Invited review: 'Disk evolution: Status and prospects for the ELT': EXO-ELT – ESO, Garching, Germany**
Jun 2025	**Invited review: 'The role of late infall for protoplanetary disc evolution': EAS 2025 Meeting – Cork, Ireland**
Jul 2024	**Invited highlights talk: 'From galactic to planetary scales: the role of external star formation environment for planet formation': IoA50 – Institute of Astronomy, Cambridge**

Jul 2024	**Invited review: 'The role of external environment for planet formation': New Heights in Planet Formation – ESO, Germany**
Oct 2023	**Invited review: 'The relevance of external photoevaporation': Core2Disk-II – Paris, France**
Jul 2023	**Invited review: 'The physical processes driving the dissipation of protoplanetary disks': EAS 2023 Meeting – Kraków, Poland**
Nov 2020	**Invited review: 'External photoevaporation in different environments': Threats from the Surroundings meeting – ESO, online**

Sep 2026	DISCO: Discs in context (contributed talk) – NRAO, Charlottesville, USA
Sep 2026	COST Action CA22133 'The birth of solar systems' (PLANETS) meeting – Heidelberg, Germany
Jul 2026	Discs on the Exe (contributed talk) – University of Exeter, UK
Jun 2026	Perspectives on star and planet formation (contributed talk) – MPIA, Heidelberg, Germany
Jan 2026	PLATO Theory Meeting (contributed talk) – QMUL, London, UK
Sep 2025	UK & Ireland Discs Meeting (contributed talk) – University of Hertford, UK
Jun 2025	DYNAMIX (contributed talk) – IoA, Cambridge, UK
Dec 2024	Heidelberg-Harvard Star Formation 2024 (contributed talk) – Heidelberg, Germany
Dec 2024	The Role of Environment in Planet Formation workshop (contributed talk) – Paris, France
May 2024	Irradiated discs workshop (contributed talk) – Royal Society, London
Jan 2024	STELLARMADE ERC meeting (contributed talk) – Grenoble, France
Dec 2023	External photoevaporation workshop – ESO, Germany
Sep 2023	Two in a Million (binaries in clusters) (contributed talk) – ESO, Germany
Jul 2023	ExoALMA workshop (contributed talk) – Observatoire de la Côte d'Azur, France
Jun 2023	External photoevaporation workshop (invited review) – University of Milan, Italy
Mar 2023	Exoplanet Systems and Stellar Life Cycles: Late-Stage and Post-MS Systems (contributed talk) – Aspen Center for Physics, US
Jan 2023	STELLARMADE meeting (invited review) – Grenoble, France
Dec 2022	ExoALMA workshop – Boston, US
Nov 2022	Disks and Planets across ESO Facilities (contributed talk) – ESO, Garching, Germany
Nov 2022	MIAPbP conference (contributed talk) – MPA, Garching, Germany
Sep 2022	Planet and binary formation in gravitationally unstable protoplanetary discs in the high-resolution era – Leicester, online

Jul 2021	Photoevaporation workshop (contributed talks) — Institute of Astronomy, Cambridge, UK
Oct 2021	PLATO conference 2021 – MIAPP, online (session chair)
Oct 2021	Gaps, Rings, Spirals, and Vortices – MIAPP, online
Sep 2021	Planet-forming Disks: From Surveys to Answers – Leiden University, online (contributed talk)
Sep 2021	Spinning Fluids – Ringberg castle (short talk)
Dec 2020	Five years after HL Tau – ESO, online
Nov 2020	Heidelberg/Harvard Star Formation Workship – online (contributed talk)
Jan 2020	Star Formation across the Universe – Hertford University, UK (workshop)
Dec 2019	South East Exoplanet Meeting – London, UK (contributed talk)
Aug 2019	Orion Uncovered – Leiden, Netherlands (contributed talk)
Jul 2019	Great Barriers in Planet Formation – Palm Cove, Australia (contributed talk)
Jun 2019	Zooming in on Star Formation – Nafplio, Greece (contributed talk)
Jul 2018	MODEST-18 – Santorini, Greece (poster presentation)

May 25 *exoALMA. XIII. Gas Masses from N_2H^+ and $C^{18}O$: A Comparison of Measurement Techniques for Protoplanetary Gas Disk Masses – Citations: 24*
L. Trapman, C. Longarini, ... **A. J. Winter** *et al.* – ApJL **984**:L18

May 25 *exoALMA. X. Channel Maps Reveal Complex ^{12}CO Abundance Distributions and a Variety of Kinematic Structures with Evidence for Embedded Planets – Citations: 20*
C. Pinte, J. D. Ilee, ... **A. J. Winter** *et al.* – ApJL **984**:L15

May 25 *XUE: Thermochemical Modeling Suggests a Compact and Gas-depleted Structure for a Distant, Irradiated Protoplanetary Disk – Citations: 7*
B. Portilla-Revelo, K. V. Getman, ... **A. J. Winter** *et al.* – ApJ **985**:72

May 25 *exoALMA. VI. Rotating under Pressure: Rotation Curves, Azimuthal Velocity Substructures, and Gas Pressure Variations – Citations: 31*
J. Stadler, M. Benisty, **A. J. Winter**, *et al.* – ApJL **984**:L11

May 25 *exoALMA. XVII. Characterizing the Gas Dynamics around Dust Asymmetries – Citations: 18*
L. Wölfer, M. Barraza-Alfaro, ... **A. J. Winter** *et al.* – ApJL **984**:L22

May 25 *exoALMA. XV. Interpreting the Height of CO Emission Layer – Citations: 19*
G. P. Rosotti, C. Longarini, ... **A. J. Winter** *et al.* – ApJL **984**:L20

May 25 *exoALMA. XVI. Predicting Signatures of Large-scale Turbulence in Protoplanetary Disks – Citations: 16*
M. Barraza-Alfaro, M. Flock, ... **A. J. Winter** *et al.* – ApJL **984**:L21

May 25 *exoALMA. XI. ALMA Observations and Hydrodynamic Models of LkCa 15: Implications for Planetary Mass Companions in the Dust Continuum Cavity – Citations: 12*
C. H. Gardner, A. Isella, ... **A. J. Winter** *et al.* – ApJL **984**:L16

May 25 *exoALMA. XIV. Gas Surface Densities in the RX J1604.3-2130 A Disk from Pressure-broadened CO Line Wings – Citations: 12*
T. C. Yoshida, P. Curone, ... **A. J. Winter** *et al.* – ApJL **984**:L19

May 25 *exoALMA. IX. Regularized Maximum Likelihood Imaging of Non-Keplerian Features – Citations: 6*
B. Zawadzki, I. Czekala, ... **A. J. Winter** *et al.* – ApJL **984**:L14

May 25 *exoALMA. VII. Benchmarking Hydrodynamics and Radiative Transfer Codes – Citations: 9*
J. Bae, M. Flock, ... **A. J. Winter** *et al.* – ApJL **984**:L12

May 25 *exoALMA. VIII. Probabilistic Moment Maps and Data Products Using Nonparametric Linear Models – Citations: 12*
T. Hilder, A. R. Casey, ... **A. J. Winter** *et al.* – ApJL **984**:L13

Mar 25 *A novel method for estimating the far-ultraviolet flux, and a catalogue for disc-hosting stars in nearby star-forming regions – Citations: 24*
R. Anania, **A. J. Winter**, G. Rosotti, *et al.* – A&A **695**:A74

Jan 25 *EWOCS-III: JWST observations of the supermassive star cluster Westerlund 1 – Citations: 17*
M. G. Guarcello, V. Almendros-Abad, ... **A. Winter** *et al.* – A&A **693**:A120

Dec 24 *A tell-tale tracer for externally irradiated protoplanetary disks: Comparing the [C I] 8727 Å line and ALMA observations in proplyds – Citations: 10*
M. Aru, K. Maucó, ... **A. Winter** *et al.* – A&A **692**:A137

Jul 24 *Kaleidoscope of irradiated disks: MUSE observations of proplyds in the Orion Nebula Cluster. I. Sample presentation and ionization front sizes – Citations: 32*
M. Aru, K. Maucó, ... **A. Winter** *et al.* – A&A **687**:A93

Jul 24 *Planet-driven spirals in protoplanetary discs: Limitations of the semi-analytical theory for observations – Citations: 4*
D. Fasano, **A. J. Winter**, M. Benisty, *et al.* – A&A **687**:A223

Jun 24 *Rotation curves in protoplanetary disks with thermal stratification. Physical model and observational evidence in MAPS disks – Citations: 44*
P. Martire, C. Longarini, ... **A. Winter** *et al.* – A&A **686**:A9

Feb 24 *EWOCS-I: The catalog of X-ray sources in Westerlund 1 from the Extended Westerlund 1 and 2 Open Clusters Survey – Citations: 8*
M. G. Guarcello, E. Flaccomio, ... **A. Winter** *et al.* – A&A **682**:A49

Dec 23 *XUE: Molecular Inventory in the Inner Region of an Extremely Irradiated Protoplanetary Disk – Citations: 40*
M. C. Ramírez-Tannus, A. Bik, ... **A. J. Winter** *et al.* – ApJL **958**:L30

Jun 23 *Roman CCS White Paper: Adding Fields Hosting Globular Clusters To The Galactic Bulge Time Domain Survey – Citations: 5*
S. K. Grunblatt, R. F. Wilson, **A. Winter**, *et al.* – arXiv:2306.10647

May 22 *An APEX search for carbon emission from NGC 1977 proplyds – Citations: 12*
T. J. Haworth, J. S. Kim, ... **A. J. Winter** *et al.* – MNRAS **512**:2594-2603

Dec 21 *The influence of the environment on the spin evolution of low-mass stars - I. External photoevaporation of circumstellar discs – Citations: 33*
J. Roquette, S. P. Matt, **A. J. Winter**, *et al.* – MNRAS **508**:3710-3729

Aug 21 *A scaling relation for the molecular cloud lifetime in Milky Way-like galaxies – Citations: 28*
S. M. R. Jeffreson, B. W. Keller, **A. J. Winter**, *et al.* – MNRAS **505**:1678-1698

Mar 21 *Proplyds in the flame nebula NGC 2024 – Citations: 40*
T. J. Haworth, J. S. Kim, **A. J. Winter**, *et al.* – MNRAS **501**:3502-3514

Dec 20 *An ALMA Survey of λ Orionis Disks: From Supernovae to Planet Formation – Citations: 38*
M. Ansdell, T. J. Haworth, ... **A. Winter** *et al.* – AJ **160**:248

Jan 20 *Flybys in protoplanetary discs - II. Observational signatures – Citations: 76*
N. Cuello, F. Louvet, ... **A. J. Winter** *et al.* – MNRAS **491**:504-514

Nov 18 *The FRIED grid of mass-loss rates for externally irradiated protoplanetary discs – Citations: 124*
T. J. Haworth, C. J. Clarke, ... **A. J. Winter** *et al.* – MNRAS **481**:452-466
